

## PLANTRONICS GAMECOM 777 EXPERIENCE THE DIFFERENCE

### Plantronics GameCom® 777 with Dolby® technology

This open-ear headset with Dolby® Headphone technology gives you an unparalleled audio advantage. An integrated USB sound card featuring Dolby technology provides a true 5 channel virtual surround sound experience. If required, an analogue connection is also provided.

- Rich stereo sound – 40mm speakers give rich sound and resonant bass
- Noise-cancelling microphone – reduces background noise and ensures crystal clear audio quality
- Concealed Microphone Boom – stows completely into the headband when not in use – ideal when listening to music or watching DVD
- Convenient controls – inline volume and mute controls give you full control over your listening and speaking experience
- The microphone boom adjusts – ideal for placement for improved communications
- Specially designed ear pods – redistribute pressure for maximum comfort for the longest gaming sessions

## THE ULTIMATE PC HEADSET FEATURING DOLBY® HEADPHONE TECHNOLOGY

### Enjoy 5.1 surround sound through stereo headphones

Dolby headphone technology actually reproduces the full sound of a speaker system in a room. With conventional headphone sound, listeners perceive that audio images are originating from inside the head, because normal mixing provides none of the cues that space and acoustics impart to a soundstage.

Dolby headphone technology differs radically from other virtual headphone solutions. It's the only one that accurately re-creates the HRTFs of a 5.1- channel system in a real listening room. By reproducing all of these complex sonic signatures in their entirety, from initial impulse to final decay, Dolby headphone provides a palpable and convincing illusion of multiple speakers around you.

## DON'T JUST TAKE OUR WORD FOR IT – ACROSS EUROPE PEOPLE ARE TALKING ABOUT THE GAMECOM 777

“ Whether you're into games like Counter Strike, watching movies or listening to your favourite music on your pc, you will definitely get a totally different experience with the new GameCom 777 headset.”

Teknofil.no, Norway, July 2008

“ It really sounds terrific. If you overhaul an opponent in a racing game like “GRID”, the engine noise of the cars is presented as if he actually comes from behind, then left and finally in the front – just like you know it from a 5.1 speaker-system.”

ComputerBILD Spiele, Germany, August 2008

“ Lightweight and comfy and won't leave you thinking you've caught leprosy in your earlobes! ”

T3, UK, September 2008

“ Playing games is so much more relaxed with this headset. ”

Veronica Gids, Holland, September 2008

“ I get some really super gadgets in this column but I can honestly say that this is one of the best I've seen in a long time. And for just short of 80 quid, this is a MUST for all gamers or just people who want the very best out of a pair of headphones. ”

Adult Sport, UK, October 2008

### STYLISH HEADSETS, BACKED BY GREAT TECHNOLOGY

#### Bluetooth® (.Audio 920 only)

Bluetooth wireless technology provides a way for devices to communicate with each other using short-range radio frequency instead of wires. Any two Bluetooth devices can communicate as long as they both have Bluetooth turned on, they are within range, and they have been paired – a quick “handshake” that connects the two devices. Bluetooth range is up to 10m. Obstructions, such as walls or other electronic devices, can cause interference or shorten the effective range. For optimal performance, place your headset and phone on the same side of your body.

#### Digital Signal Processing (DSP technology)

Digital Signal Processing technology delivers up to 35% reduction in background noise, whilst maintaining crisp clear voice transmission.

If you are planning to use your .Audio headset for chatting over the Internet, or for games which rely on voice recognition, it is well worth looking for a DSP model – especially so, if you live in a lively household where there is a lot of background noise.

#### QuickAdjust

Enables ideal microphone boom placement.

#### Noise-cancelling microphones

Plantronics' noise-cancelling microphones reduce the background noise and so enhance the accuracy of the sounds being transmitted.

They are ideal for noisy environments.

#### WindSmart®

Plantronics' patent-pending WindSmart technology uses a specially designed material over the microphone to diffuse wind noise, so that even in windy environments – such as the car or the street – users can enjoy crisp, clear conversations.
